FLUID REPLACEMENT = LONG SERVICE LIFE = MORE REVENUE.

Engine and reduction housing oil replacement is a drag but are necessary to keep your fleet running properly. We've compiled a list of products here that will help you speed up and clean up the process.

LETS START WITH THE DRAINZ-IT KIT.
What is it? How does it work?

The Drainz-it kit contains fittings and hose(s) that replace the oil drain bolts on both the engine and reduction (clutch) case. The hose is held up, out of the way by a rubber strap when not in use. To use, simply unstrap the hose and hook up an oil extractor to remove the oil from each.

OIL EXTRACTOR:
1-60-A0141

Our oil extractor is an electric unit with a pump. Once connected it creates a vacuum and the oil is quickly removed from the case.

OIL DISPENSER:
1-60-A0140

Our oil dispenser is an air driven pump with a meter for accurate dispensing of oil.

THE BIG MOVE IS DONE & THE ABC PRODUCTION HAS BEGUN AT J&J.

If you haven't heard, J&J has acquired Automated Batting Cages. We purchased ABC in January, moved all of ABC's equipment and supplies 4 miles down the road to our Salem, Oregon production facility.

What will change? You ask. Nothing. Our top notch customer service will now extend beyond go karts & bumper boats to include batting cage equipment.

We are hard at work producing baseballs & softballs & soon will always have stock on hand. Our goal is to always have the parts you need, when you need them.
